Winclap Market Publisher API

V2.1 - 2017, Aug

Version History

Version	Date	Description
1.0	2016, May	First Version
2.0	2017, Jan	Added all offer information on list endpoints. Added new fields for offer object and reorganized others. This version allows paginated responses. This version allows filtering by parameters.
2.1	2017, Aug	Endpoints: /apply and /offers are not necessary. Desired fields: Added new desired fields for offer object. Countries list added.

Introduction

Welcome to Winclap's Market Publisher API. This service will allow you to automate your work and access your account data remotely.

Integrating with Winclap's Market Publisher API is pretty simple, you only need to generate HTTP requests to a determined endpoint, and you will get a JSON response from us. In this document you will find every available endpoint, the parameters you need for each of them, and the method you will have to use to generate the request. Also you will find the format of the answer you will receive, and an example for you to get familiarized with our tech.

Supported Endpoints

Winclap's Market Publisher API supports the following endpoints:

offers/approved/ - List of offers that you are approved to run

offers/<pk>/ - Obtains the offers detail.

Access to the API

Every Affiliate user that would like to access Winclap's API will have to go through its Account Manager, who will trigger the process, and provide access from an internal platform. This will generate a unique token that will be later used to authenticate the Affiliate, and the Affiliate will use it to access the API.

Every HTTP request will have to contain this parameter, in addition to the id number provided by the

Account Manager (Affiliate ID), to ensure the authentication and authorize the request. Your Account Manager is responsible to generate and provide you with an access token and id number (Affiliate ID).

Token Example	5926ca75-348a-4d03-9d04-6f8c188d3859
Affiliate ID Example	253
Base URL	http://api2.winclap.com/market/v2/offers/

REFERENCES

Offer object

An offer object represents a campaign that can be passed to an Affiliate. The fields below describes an offer object:

Name	Type	Required	Description
id	integer	required	Winclap's platform offer identifier.
status	integer	required	Offer status. (See Status table)
name	string	required	Offer name.
restrictions	string	optional desired	General offer description and restrictions.
type	integer	required	Payout type of the offer. (See Type table.)
incent	boolean	optional desired	Whether or not this offer accept incent traffic.
app	App object	optional	App information of the CPI offer. (See App object.) Required when offer type is 0 ("CPI").
site	Site object	optional	Site information of the CPA offer. (See Site object.) Note: Required when offer type is 1 ("CPA").

start_date	string	required	Date and time when the offer starts.
due_date	string	optional	Date and time when the offer ends.
tracking_link	string	optional desired	The click tracking URL of the offer.
payout	float	required	Rate to be payed for each conversion.
daily_cap	integer	optional	The number of daily capping in conversions.

		desired	
pub_blacklist	array of strings	optional desired	Array containing publishers id blocked to run this offer.
creatives	array of Creative objects	optional desired	Array containing the info creatives of the offer. (See Creative object.)
countries	array of strings	optional desired	Array containing codes of targeted countries of the offer. (See countries references)
cities	array of strings	optional desired	Array containing cities using United Nations Code for Trade & Transport Locations.

platform	integer	optional desired	The targeted operating system for the offer. (See platform table) Note: Required when offer type is 0 ("CPI").
os_versions	array of strings	optional desired	Array containing the targeted versions of the operating system depending the field platform.
connection	integer	optional	The targeted connection type of the offer. (See connection table)
device	integer	optional	The targeted device type of the offer (See device table)
gender	integer	optional desired	The targeted gender of the offer. (See gender table)
min_age	integer	optional desired	The number of minimum age targeted.
max_age	integer	optional desired	The number of maximum age targeted.
categories	array of strings	optional desired	Array containing the targeted IAB categories. (See categories table)

App object

An app object represents a store application, where the end user should be redirected. It could be for:

- Android (Google Play™ Store)
- iOS (App Store® or iTunes Store®)
- Windows Phone (Windows Store®)

The fields below describes an app object:

Name	Type	Required	Description
preview_url	string	required	Application store URL.
name	string	required	Application name.
description	string	optional	Application store description.
icon	string	optional	Application icon URL.

Site object

A site object represents a website where the end user should be redirected. The fields below describes a site object:

Name	Type	Required	Description
preview_url	string	required	Site URL.
icon	string	optional	Site icon URL.

Creative object

A creative object represents a image that should be shown to the end user. The fields below describes a creative object:

Name	Type	Required	Description
id	integer	required	Winclap's platform creative identifier.
name	string	required	Creative name.
url	string	required	Creative image downloadable url.
mimetype	string	required	Creative image mimetype.
format	string	required	Creative dimensions, width by height.

API END POINTS

offers/approved	
Example	http://api2.winclap.com/market/v2/offers/approved/?token=5926ca75-348a-4d03-9d04-6f8c188d3859&affiliate=253
Description	List of offers you are approved to run.
Method	GET
